June 25-30, 2017
Asilomar Conference Center // Pacific Grove, California
http://www.wcpp14.org/

You are warmly invited to the 14th World Congress on Parasitic Plants. This congress, first convened in 1973 in Malta, brings together researchers from all parts of the world to discuss their latest findings in parasitic plant biology. Topics to be discussed this year include parasitic plant genes and genomes, ecology and evolution, and the biochemistry and physiology of host plant-parasitic plant interactions.

Parasitic weeds can place enormous constraints on agricultural productivity throughout the world. This Congress provides a venue for academic and industry scientists to discover how recent findings in parasitic plant biology can be translated into novel strategies for parasitic weed control.

REGISTRATION DEADLINE June 1, 2017
ABSTRACT DEADLINE April 14, 2017

Keynote speakers:
Peter McCourt, University of Toronto
Stéphane Muños, INRA, Toulouse
Claude DePamphilis, Penn State University
Markus Albert, University of Tuebingen
Steven Runo, Kenyatta University
Philippe Delavaudt, University of Nantes
Salim Al Babili, King Abdullah University
David Nelson, University California, Riverside
Jonne Rodenburg, Africa Rice Center, CGIAR
Hanan Eizenberg, ARO Volcani Center

Scientific committee:
Julie Scholes, University of Sheffield
Jim Westwood, Virginia Tech
Claude DePamphilis, Penn State University
Ai-Rong Li, Kunming Institute of Botany
Maurizio Vurro, Italian National Research Council
Philippe Delavaudt, University of Nantes
Radi Aly, ARO Volcani Center
Pradeepa Gunathilake, University of Peradeniya
Michael Timko, University of Virginia S
Kassim Al-Khatib, University of California, Davis
Steven Runo, Kenyatta University
Lytton Musselman, Old Dominion University
Philippe Simier, University of Nantes
Duncan Cameron, University of Sheffield
Harro Bouwmeester, University of Amsterdam
Hinanit Koltai, ARO Volcani Center
Yaakov Goldwasser, Hebrew University of Jerusalem
Jonne Rodenburg, Africa Rice Center, CGIAR
John Yoder, University of California, Davis
