

DMWG Meeting 2016_11_14

Presentation

- Presentation: ESIP Data Management Training - **Tamar Norkin (USGS)** and DMP Page Tiger Team Update- **Michelle Chang (USGS)**
 - (15) CDI Data Management Working Group-20161114 1902-1.arf [Webex]

WG Updates/Discussions:

Cassandra - Can you describe your development framework

Tamar - We started out with a submission form. Created a metadata standard with fields to collect from contributors that describes the types of data management training. Set up the interface and went through user testing. Now starting to opening it up to accepting broader submission

2017 CDI Workshop Proposed Sessions

Group discussed the following topics for the CDI Workshop:

- Data citation and attribution - already proposed
- Data repository and security - E.g. budgeted 5K for security and IT found out data was being added to an unsecured location which tripled the cost of security.
 - Similar to the OEI proposed session on Good Data Infrastructure
 - We might want to invite USGS IT security reps to the workshop
 - Debate or Panel about Security vs Funding and Budget Planning - What are the challenges to maintaining security? Is it reasonable? How do others go about making those funding decisions? Perhaps centers and research scientists can be invited to provide their perspective
- Where is the Fun in Data Management? - Lightning talks from data managers and stewards about why we love our jobs.
