

# Filtering by County

**County:** The name of the county or county equivalent (parish, borough, etc.) within a state

- Hints and Tricks:**
- A State MUST be selected before a list of counties will be displayed
  - Counties from multiple states can be selected by choosing another state followed by the additional counties
  - You can save more complicated (or even simple) sets of filter criteria for future use using either of the "Save Filter Set" buttons at the top or bottom of the window

The screenshot shows the 'Geographic Location Filter' window. On the left, a vertical list of radio buttons allows selecting filter criteria: 'No filter selected in this section', 'State', 'County', 'Latitude/Longitude', 'Drainage Basin/Hydrological Unit Code (HUC)', 'Ecoregion', and 'Sites'. The 'County' option is selected. To the right, a text input field labeled 'Find Counties by State:' contains 'ARIZONA'. Below this, a list of counties is shown under the heading 'Counties to add to filter'. The list includes APACHE - ARIZONA, COCONINO - ARIZONA, GILA - ARIZONA, GRAHAM - ARIZONA, GREENLEE - ARIZONA, LA PAZ - ARIZONA, and MARICOPA - ARIZONA. To the right of this list are two arrow buttons pointing right. Further right, another list is titled 'Counties currently on filter'. It contains ARAPAHOE - COLORADO, BACA - COLORADO (highlighted), and COCHISE - ARIZONA. To the left of this list are two arrow buttons pointing left. A 'Filter Definition Help' link is visible in the top right corner.
