

Registry of SW work at USGS

this isn't a registry yet.

We're starting by making a list of the information we would like to collect about USGS projects or people who are working with Semantic Web technologies.

A list:

- person
- project
- publication
- tool
- link to more information about the tool

Possible Implementation Tools

[LODSPeaKr](#) - LODSPeaKr is a framework to create Linked Data applications and publish RDF data in a fast way and without much effort.

[Elda](#) - the linked-data API in Java
