

Data Sharing - Agreements and Processes

Session type: Presentation and Discussion

Point of Contact: JC Nelson (volunteered by Viv Hutchison (vhutchison@usgs.gov))

How can we improve the process of data sharing? What successes have we had post Oct 1 and what challenges remain? How do we handle shared data? Is it possible to have a shared library of approved data sharing agreements? Let's hear from scientists to understand the challenge, progress that has been made in terms of agreement templates, and where to go from here.
