

Face-to-face meeting of Metadata Reviewers Community

The USGS Metadata Reviewers Community of Practice, which is sponsored by the CDI Data Management Working Group, would benefit from a face-to-face meeting early in the workshop week. This might look like a hands-on-training session, in which we gather around a metadata record or a metadata validation tool, for a discussion, or a working group meeting in which we revise the checklists for data and metadata review, depending on the Community's needs at that point.

Other focus groups, teams, and committees would also benefit from face-to-face meetings, some of which might be happening simultaneously.
