

National Map Corps mapathon

Session type: Hands-on Session

Point of Contact: Elizabeth McCartney (emccartney@usgs.gov)

Description:

Learn about the USGS Citizen Science project [The National Map Corps](#) and help improve structures data at the same time. We will be confirming, updating, adding new features, and removing obsolete points using our online [Map Editor](#). Both newly collected and modified point features become part of the USGS National Structures Database, The National Map, and ultimately U.S. Topo Maps. All you need is your laptop and a willingness to learn.
