

# Project Status

Project status is a concept used by the projectStatus attribute in the [Project](#) and BASIS+ extensions. It describes the basic status of a project that can correspond to a temporal concept or not. It has the following possible values:

- Active
  - The project is currently being executed.
- Approved
  - The project's proposal has been accepted but is not yet active.
- Completed
  - The project has been completed and is no longer active.
- In Progress
  - The project is currently in progress.
- Proposed
  - The project is planned but not yet started.

The list of project statuses is stored in the [ScienceBase Vocabulary](#). You can view an [always up to date list of these statuses here](#).
