

Conservation Plans and Agreements Database (HCP, SHA, CCA, and CCAA's)

Data Definitions

Title: The name of the plan/applicant or agreement.

For HCPs with long term permits, subarea plans, amendments - use the standard name then comma then qualifier. For example "MSCP, County of San Diego Subarea Plan, Cielo Amendment." All plans and amendments associated with MSCP will then be listed together. For HCPs where the permittee/applicant has more than one HCP - use a unique qualifier after the name. For example, Plum Creek timber company has three distinct HCPs in various stages of development and approval. All of these HCPs are listed together but with qualifiers that distinguish the three.
