

March Tech Stack Working Group: New Python Mapping Tools

At the last Tech Stack Working Group meeting, Felipe Fernandes (<http://ocefpaf.github.io/>) discussed some of the new python packages such as mpleaflet and folium, which are making it possible to create dynamic maps using leaflet in the browser without writing any JavaScript code.

Some useful links:

- **Cartopy:** <http://scitools.org.uk/cartopy/docs/latest/index.html>
- **Folium:** <https://github.com/python-visualization/folium/blob/master/README.rst>

The next TSWG meeting is 4/21/16 on **The New Geoplatform.Gov** [Geoplatform.gov](#) was recently rebuilt from the ground up. Jerry will talk about new features of the platform and plans for the future.

Check out the [Tech Stack WG Meetings page](#) for more info.
