

New comprehensive blog post on invasive plants in the United States

August 19, 2021

The Center for Invasive Species Prevention (<https://cisp.us>) posted on August 17th a blog about invasive plants that was created by invasive species expert [Faith Campbell](#). The comprehensive article provides an overview of the problem, shortcomings of how invasive plants are treated on public and private lands, and criteria for success in addressing the invasive plants issue. Access the blog here, and leave a comment:
