

# BASIS+ Extension

BASIS+ is an internal USGS system used for managing budget and allocation for science projects and other USGS activities. BASIS+ summary information is harvested and aggregated into ScienceBase to support discovery and planning for science in the organization. BASIS+ information access is limited to USGS employees. Much of the BASIS+ information is integrated into the [ScienceBase Item Core Model](#) with the remainder contained within the following schema.

## Properties

Property	Type	Description	Example
<b>className</b>	String	discriminator used by the system to identify the extension type	"gov.sciencebase.catalog.item.facet.BASISPlusFacet"
<b>annualGuidance type program fiveYearGoal</b>	List<BASISPlusAnnualGuidance>	A collection of annual guidance statements.  String type, String program, String fiveYearGoal	type: "Primary"  program: "Science Support"  fiveYearGoal: "Publish Research"
<b>products</b>	List<String>	A collection of strings representing citations for planned or completed products.  String product	product: "citation 1"  product: "citation 2"
<b>narratives type content</b>	List<BASISPlusNarrative>	String type, String content	type: "Objectives"  content: "1. Get Research, 2. Get Published"

## Example

```
{
  narratives: [
    {
      content: "test narrative content",
      type: "test narrative type"
    }
  ],
  annualGuidance: [
    {
      fiveYearGoal: "test guidance 5yr goal",
      program: "test guidance program",
      type: "test guidance type"
    }
  ],
  products: [
    "test product"
  ],
  className: "gov.sciencebase.catalog.item.facet.BASISPlusFacet"
}
```
