

GIS Programming

For now, just a grab-bag of tips. If you link to or bookmark a page below, we recommend using the "tiny" URL found under the "..." button's "Link to this page..." option (like <https://my.usgs.gov/confluence/x/RSxKI> for this page). This way, if things get retitled or moved around, your URL will still work (which won't be the case if you use the default long version, like <https://my.usgs.gov/confluence/display/cdi/GIS+Programming> for this page).
