Delete file in manager

Files are initially displayed in manager

Select the delete from the dropdown Action Menu

A delete confirmation dialog is shown

Select Delete File

1. Yes
   - Close the file handle CURD?
   - 1. Yes
     - Copy the row from "file" table to "file_deleted" table
     - Make a call to Catalog REST API delete action to remove the record
   - 2. No
     - Delete the row from "file" table
     - On refresh the file row will not be present in manager
     - Notes:
       1. File was uploaded from manager
       2. File was uploaded from catalog

       In both of the cases, the actual file is not deleted, this action can be performed later.

2. No
