

The Project List

Projects can either be selected from the [Dashboard](#) or from the Project List

Project List

In the project list, you can:

- **Navigate** to and **Edit** your projects
- **View** other project
- Request a new project using the 'Request a New Project' button
- **Filter** by selecting either 'My Projects' or 'All Projects'
- **Sort** the project list by any of the displayed columns. The width of these columns can also be adjusted for easier viewing.

If no projects appear in the BioData Projects panel, you are probably not a member of the project staff of any projects in BioData.

- For project access, contact a member of the project staff of the project or the BioData team ([contact us](#)).
- To request a new project, [contact us](#) or click on the 'Request a New Project' button in the application
