

IPETT - WRRRI - User Help

The WRRRI (Water Resources Research Institutes) Version of the Integrated Proposal and Evaluation Tracking Tool (IPETT) is designed by USGS to support the organization, reviewing and collection of deliverables for the scientific community. Our focus is to provide flexible workflows that facilitate the grant collection, review and approval process.

Integrated Proposal and Evaluation Tracking Tool (IPETT)

- Plans, facilitates, and conducts research to aid in the resolutions of mission area agendas
- Promotes technology transfer and the dissemination and application of research results
- Provides for the training of scientists and engineers through their participation in research
- Provides for competitive grants to be awarded under through the [grants.gov](https://www.grants.gov) process

The WRRRI (Water Resources Research Institutes) Version has 4 different configurations: Annual Base Grant, National Competitive Grant, Student, and Coordination Grant. There are 4 roles associated with WRRRI: Institute, Reviewer, Manager, and Admin.
