Delete file in manager

Files are initially displayed in manager

Select the delete from the dropdown Action Menu

A delete confirmation dialog is shown

Select Delete File

1. Yes

Copy the row from "file" table to "file_deleted" table

2. No

Make a call to Catalog REST API delete action to remove the record

Delete the row from "file" table

On refresh the file row will not be present in manager

END

Notes:
1. File was uploaded from manager
2. File was uploaded from catalog
   In both of the cases, the actual file is not deleted, this action can be performed later.
