Training

The Biological Users Group (BUG) and the BioData development team continually strive to provide a system that is both user friendly and functional and we hope that the user interface is very intuitive to use, but if you have any questions regarding its use please don't hesitate to Contact Us.

This Support System is intended to provide easy to access and up-to-date information on the use of the system, so please use it and definitely Contact Us if you are having trouble finding the information that you need.

We also maintain a copy of the production database that users can request access to so they can learn about the system without any fear of the "breaking" anything. Again, please contact the BioData team to gain access to this system.
